DETAILED ACTION

Remarks

1. The amendment filed on May 19, 2005 has been received and entered. Claims 23-27 have been cancelled. Therefore, claims 1-3, 6, 8 and 9 are now pending.

2. Claims 1-3, 6, 8 and 9 have been amended pursuant to the indications of allowable subject matter indicated by the examiner in the final office action. However, in light of the identification of new prior art by the examiner, new grounds of rejection must be applied. Accordingly, this office action is made non-final.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-3, 6, 8 and 9 are provisionally rejected under the judicially created doctrine of double patenting over claims 1-23 of copending Application No. 10/403,106. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

5. The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows:

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are broader than claims 1-23 of Serial No. 10/403,106 which encompasses the same metes, bounds, and limitations. Therefore, it would be obvious to eliminate the limitations of the narrower claims, since it has been held that omission of an element and its function and a combination where the remaining elements perform the same functions as before involves only routine skill in the art. See In re Karlson, 136 USPQ 184.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending

application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
